

# THE TRACTION BLUEPRINT

## FREE TRACTION CHECKLIST

You don't need to go viral — you need traction. This checklist gives you five proven habits to help creators and small businesses get seen, get clients, and build real momentum — without burning out.

### 1■■ Define Your Focus

Be crystal clear about who you serve and what single problem you solve. One focused message beats ten random posts.

### 2■■ Automate Consistency

Batch content weekly and schedule it using tools like Metricool or Pictory. Consistency builds visibility.

### 3■■ Blend Emotion + Logic

Share short stories that make people feel something — then show them what to do next. Emotion attracts, logic converts.

### 4■■ Build a Simple Funnel

Use one link (Linktree or Adz.Solutions) to route people to your services, partners, and affiliate offers.

### 5■■ Track What Works

Check your insights weekly. Double down on what performs and drop what doesn't. Traction grows from iteration, not perfection.

### ■ Ready to Get Traction Faster?
